

CANBERRA FERTILITY CENTRE

COUNSELLING

The Canberra Fertility Centre offers counselling to all patients.

New IVF patients, gamete donors and recipients, and surrogacy patients attend mandatory counselling sessions. Gamete donors and recipients may have mandatory counselling completed in their home state if appropriate but CFC needs a copy of the report which must be completed by a counsellor accredited with ANZICA (Australian and New Zealand Infertility Counsellors Association).

Some patients may require some emotional support from time to time during their fertility treatment and an appointment with the counsellor may be made by ringing the clinic. The counsellor is fully qualified and accredited and a member of ANZICA. Please contact the clinic regarding counselling fees.
